DataCamp Assignments

You must complete ALL of the following assignments on DataCamp by the end of this course (last session).

Assignment completion (including *participation in class*!) **counts toward your final grade** (20%).

Before the course ends, **double-check** that you've finished all your assignments.

> Please log in with your **school email address**. You should already have access. If you experience any issues, please contact me.

> 2026/2027: You will have full access to Data Camp until February 17, 2027!

Required assignments

- Course: Introduction to Python (all chapters)

- Practice: Introduction to Python

- Course: Data Types in Python:

  - Chapter 2: *Dictionaries - The Root of Python*

- Course : Introduction to Functions in Python :

  - Chapter 1: *Writing your own functions*

  - Chapter 2: *Default arguments, variable-length arguments and scope*

- Course: Introduction to Data Visualization with Matplotlib

- Chapter 1: *Introduction to Matplotlib*
- Chapter 2: *Plotting time-series*

> You are required to complete *at least* the listed chapters for each course.

Strongly recommanded courses (advice)

These DataCamp courses are *not* mandatory, but you are *strongly encouraged* to take them:

- Course: Introduction to Numpy:
  - Chapter 1: *Understanding NumPy Arrays*
  - Chapter 2: *Selecting and Updating Data*
  - Chapter 3: *Array Mathematics!*
- Course: Data manipulation with pandas (all chapters)
- Course: Introduction to Data Science in Python (all chapters)

> Feel free to complete other courses on DataCamp! This will be reflected in your grade.
